## Accreditation

East Valley Institute of Technology Adult Education is Accredited by the Commission of the Council on Occupational Education, 7840 Roswell Road, Building 300, Suite 325 Atlanta, GA 30350, Telephone: 770-396-3898 / FAX: 770-396-3790, [www.council.org](http://www.council.org) and by the Administration for Veterans Training.

EVIT is a public non-profit institution recognized by the Arizona Department of Education as an accredited Career and Technical Education institution.

Arizona State Board of  
Cosmetology

# DEFINITIONS & DISCLAIMERS

## **CERTIFICATE PROGRAMS**

A formal award certifying the satisfactory completion of a postsecondary education program & is essentially the process of publicly attesting that a specified quality or standard has been achieved or exceeded (AMTA Definition).

## **PROGRAMS ON DEMAND**

EVIT Adult Ed. offers short term, on demand training programs to meet business, industry and community training needs. Course offerings are based on student request and student enrollment. Students are welcome to submit their requests to the EVIT Adult Ed. Admissions Department 480-461-4113.

## **BLENDED PROGRAMS**

EVIT high school programs offer a limited number of seats for adults who want a daytime/2.5 hour schedule. Adults over the age of 18 enrolling in a high school program will need a DPS Fingerprint Clearance Card prior to starting class. Contact an enrollment adviser at 480-461-4113 for detailed information. Blended Programs do not qualify for Government Financial Aid and only offer a Certificate of Training.

## **Licensure**

A non-voluntary process by which an agency of government regulates a profession. It grants permission to an individual to engage in an occupation if it finds that the applicant has attained the degree of competency required to ensure the public health, safety, and welfare will be reasonably protected.

## **Licensure Disclaimer**

EVIT Adult Education courses and programs prepare students for entry into a variety of professions. Many of these professions require that a person hold an occupational license or certificate in order to work in a particular field. Typically, a person must meet certain legal requirements before obtaining such a license or certificate. These requirements are established by county, state or federal agencies and often are based on a person's character, or whether the person has been convicted of a criminal offense. It is possible for a student who has obtained a certificate from EVIT to be denied the right to work in a particular profession after completing the certificate because of concerns over the student's character or criminal background. Any student preparing to enter a field for which a professional license or certificate is required is strongly advised to consult with the appropriate government agency that issues such credentials. That agency can provide the student complete information about any requirements the law imposes for working in a particular occupation.

## **Anti-Discrimination Policy**

EVIT does not discriminate on the basis of race, color, gender, national origin, disability, religion or age in its programs, services or activities. Compliance: Title IX, Title VI, Section 504 of the Rehabilitation act of 1973, the Americans with Disabilities Act of 1990, and Drug –Free Workplace Act of 1988. For information regarding discrimination grievance or complaint procedures, contact the Director of Adult Education at 480-461-4156.

## **Student Insurance**

It is important students recognize EVIT does not have insurance to cover injuries students may sustain while in class related activities **not conducted on EVIT property**. Students are encouraged to obtain coverage through their family medical plan or purchase separate medical insurance through an optional district approved vendor. Medical insurance informational pamphlets are available at the Adult Education Center information counter. EVIT is not responsible for personal injury or loss of property while on campus

**Tuition and Fees:** Tuition and fees are approved by the EVIT Governing Board and are subject to change without notice.

# BARBERING

CS-15

A barber is a professional who cuts, trims, and styles hair for clients. Most barbers also provide facial hair maintenance, custom shaves and other grooming services. The goal of a barber is to make each client feel comfortable and at ease while their hair is being cut or styled. The barber also seeks to ensure that the client is happy with his or her hairstyle, length and color or his new facial hair style. Barbers cut, trim, shape, and taper their clients' hair. They usually use tools such as scissors, clippers, razors, and combs. When a barber grooms a client's facial hair, he will apply lather to the area to be shaved, usually the beard or hair contour. He will then remove the unwanted hair using a razor. Barbers may also provide other services such as applying lotions, shampooing, styling, coloring hair, and singeing. In addition, a barber may perform massage services for the scalp, neck, and face. Barbers will typically bill the client, accept payment and tips and finalize the sale. They may also sell the client products such as shampoo, lotions, or tonics that will meet their styling, grooming and maintenance needs between appointments. They will clean their work area and tools according to Arizona's safety and sanitation requirements after each appointment.

This comprehensive 1500 hour program prepares the student with the knowledge and skills necessary to complete the examination for a Barber License in the State of Arizona.

**Occupational Profile:** <http://www.onetonline.org/link/summary/39-5011.00>

**Consumer Information/Gainful Employment:** N/A

# BICSI-ITS CABLING & INSTALLATION – INSTALLER I

BICSI (Building Industry Consulting Service International) is the ITS industry leader in design, management, installation and maintenance of Information Technology Systems. BICSI provides the most prestigious certifying credentials available in the industry. Students will learn the importance of safety and professionalism for ideal job performance. Discussion topics will include pathways, spaces, fire-stopping and how to choose the correct tool or procedure for specific tasks. Additionally, the participant will have a solid understanding of decision-making based upon applicable codes, standards and best practices. This program affords the student the basic skills needed to successfully complete the BICSI Certification Examination at the ITS Installer Level 1 post program completion.

**Occupational Profile:** <http://www.onetonline.org/link/summary/49-9052.00>

**Consumer Information/Gainful Employment:** [http://www.evit.com/programs/adult\\_programs/consumer\\_information](http://www.evit.com/programs/adult_programs/consumer_information)

# BICSI-ITS CABLING & INSTALLATION – INSTALLER II COPPER

# IT80

BICSI (Building Industry Consulting Service International) is the ITS industry leader in design, management, installation and maintenance of Information Technology Systems. BICSI provides the most prestigious certifying credentials available in the industry. This program provides an overview of the transmission principles of copper cable, professionalism, safety and general industry best practices. Upon completion of the program, students will be able to: accurately interpret drawings, plans and specifications; discuss cable selection and implications for application on the network; make recommendations based upon applicable codes, standards and best practices; interpret the job plan and perform upgrades for existing infrastructure. The intermediate program prepares the student to take the BICSI Certification Examination at the ITS Installer 2 Level, specializing in copper cabling. The certification will be administered post completion of the program.

# BICSI-ITS CABLING & INSTALLATION – TECHNICIAN

IT90

BICSI (Building Industry Consulting Service International) is the ITS industry leader in design, management, installation and maintenance of Information Technology Systems. BICSI provides the most prestigious certifying credentials available in the industry. This program is designed to improve the student’s knowledge and skills in cabling installation and will focus on the study of specialized systems and advanced copper and optical fiber structured cabling systems. Topics addressed during the training include: advanced copper and optical fiber splicing, testing and troubleshooting; evaluation of specific applications of ITS cabling installations; Interpretation of multiple aspects of field coordination, including site surveys, blueprint reading, network infrastructure and project management. Students will lead an installation group or team using project management skills. This BICSI recognized ITS Technician Training will prepare the student to take the BICSI ITS Technician Certification Examination post completion of the program.

# COLLISION REPAIR

AB10

Includes fundamental hands on training in collision repair shop operations, materials handling and safety practices. Students will be introduced to basic operations in many areas of the collision repair industry with a focus on entry-level position skills. Students will gain basic understanding of safety practices, tool and equipment usage, maintenance, basic repair process and procedures, damage assessment, metal repair, structural re-alignment, welding techniques, paint preparation, painting and detailing. Students will also experience structural and plastic repair techniques. In addition, students will gain knowledge of the mechanical and electrical components of late model automobiles and experience a well-balanced mix of classroom lecture, lab and shop activities for hands-on, real life practice.

**Occupational Profile:** <http://www.onetonline.org/link/summary/49-3021.00>

# COSMETOLOGY

If you crave a career with flexible schedules, the opportunity to be creative, and the ability to control your income limits, then invest in an exciting and rewarding career in Cosmetology. Job growth in cosmetology is expected to rise at a rate of 13% between 2012 and 2022 (BLS, 2015). Cosmetology students learn the foundation of haircutting, color, texture, hairstyling, skin care and nail care. Students will progress to advanced techniques that are relevant while learning in both a classroom setting and in the student salon. The Student Salon is open to the public providing real time opportunities to practice technical skills in hair and nails. Students will also interface with industry experts, participating in trade shows, events and workshops. The successful completion of the 1600 hour Cosmetology program, will prepare students to take the Arizona State Board of Cosmetology Examination.

**Occupational Profile:** <http://www.onetonline.org/link/summary/39-5012.00>

# GEORGE BRAZIL PLUMBING SERVICE & REPAIR TECHNICIAN PLB10

The Plumbing Service and Repair Technician Program is a comprehensive program designed to train students to become a qualified technician in plumbing service, repair and plumbing installation. The program offers a learning environment combining many distinct, but interconnected areas in the plumbing field including: plumbing theory, hands-on assessments, construction trades safety, residential water quality, green technologies, sales and marketing strategies, professionalism, problem solving, customer service and communication skills, and job readiness strategies. Certifications will be offered to program graduates by George Brazil Plumbing and the National Center for Construction Education and Research (NCCER). Additionally, many manufacturer specialty certifications may be awarded. Graduates will be qualified for employment in the plumbing field as an entry level plumbing service and repair technician or entry level plumbing installation technician.

# HEATING, VENTILATION, AIR CONDITIONING & REFRIGERATION (HVACR) AC10

The US Bureau of Labor Statistics projects that HVAC Technician jobs will grow over 20% in the next 10 years, almost twice the average for all careers. Students in this program are provided training in electrical maintenance, residential, commercial and industrial wiring, appliance repair, air distribution and balancing, and repair of electronic controls and circuits. Air conditioning students learn the skills required to install service and repair air conditioning, refrigeration and heating equipment. The program prepares students for the EPA Examination for refrigerant licensing, which is required to become a HVAC Technician. In addition, students will be eligible to sit for the NATE Certification Exam post completion of the program.

## PRACTICAL NURSE (PN)

Licensed Practical Nurses (LPNs) work under the direct supervision of a physician or registered nurse and form an integral part of the health care team. Professional duties of the LPN include: client assessments; medication administration; providing therapeutic, diagnostic, nutritional and wound care support; collaboration with the interdisciplinary care team; contributing to the client plan of care; and providing client and family healthcare education. This program includes a comprehensive course of study that combines theory with clinical practice. The curriculum is designed to provide qualified individuals an opportunity to acquire the knowledge, skills and attitudes that will enable them to become safe and competent practical nurses. Program completers are eligible to apply for the Arizona State Board exam to secure licensure.

**Industry/Program Certification:** Arizona Board of Nursing #96-130

**Occupational Profile:** <http://www.onetonline.org/link/summary/29-2061.00>

**Consumer Information/Gainful Employment:** [http://www.evit.com/programs/adult\\_programs/consumer\\_information](http://www.evit.com/programs/adult_programs/consumer_information)

**Licensure Information:** <https://www.azbn.gov/media/1500/rn-lpn-endorsement-packet-09292014.pdf>

**Career Pathways:** Licensed Practical Nurse, Registered Nurse

**Prerequisites:** Advising Session with Nursing Director, High School Diploma or GED, TEAS Test with a score of 60% or better & Medical Experience. Strongly Recommend Arizona Board of Nursing Nurse Assistant License.

# PRECISION MACHINING & MANUFACTURING TECHNOLOGY MT10

The Precision Machining & Manufacturing Technology program is designed to teach the technical skills necessary to ensure students are prepared for the entry level basics in set up and operation of manual and computer numerical control (CNC) machine tools. Students will learn to read and interpret blue print drawings, learn the proper use of precision measuring tools used by machinists, die and mold makers, and skilled professionals in the manufacturing industry. Students will develop leadership, management, and quality control skills while working towards nationally recognized NIMS certifications.

# SOLAR MAINTENANCE & INSTALLATION TECHNICIAN- PV

ST10

The solar power industry is a rapidly growing field that is expected to help ease human dependence on the use of fossil fuels. Qualified Solar Maintenance and Installation Technicians are in high demand to meet the needs of the solar industry. Technicians configure, install, inspect and maintain photovoltaic solar panels and associated equipment. This program will address Solar Photovoltaic Power Plant design, operation and maintenance activities. In addition, the program will fully prepare the student to gain the knowledge and skills needed to be successful in the field. Classroom instruction and extensive hands-on exercises will meet selected objectives of the National Center for Construction Education and Research (NCCER) and the North American Board of Certified Energy Practitioners (NABCEP) certification for Solar Photovoltaic Installation Technician/Professional Exams.

## STERILE PROCESSING TECHNICIAN

Sterilization technicians are allied health professionals responsible for decontamination, inspection, assembly and sterilization of surgical instruments and surgical supply. Sterile processing technicians work under close supervision of the operating room team in providing fully functional, sterilized and ready-to-use surgical equipment. They work closely with any other department in the health-care facility where there is a need for sterilized items that are used on a patient. In today's world of health care, a Sterile Processing Department must be filled with highly trained and skilled professionals who are familiar with all aspects of the job, surgical procedures and infection control procedures and practices. The sterile processing technician must possess a great knowledge of surgical instruments, surgical supply, sterilization methods and sterile storage. EVIT is proud to be one of the few educational institutions with a fully functional sterile processing lab as well as all the necessary equipment that will help students acquire the skill sets needed to be valued leaders in the profession.

# SURGICAL TECHNOLOGY

MC51

Surgical technologists are Allied Health Professionals, who are an integral part of the team of medical practitioners providing surgical care to patients. Surgical technologists work under the supervision of a Registered Nurse to facilitate the safe and effective conduct of surgical procedures, ensuring that the operating room environment is safe, that equipment functions properly, and that the operative procedure is conducted under conditions that maximize patient safety. Surgical Technologists possess expertise in the theory and application of sterile and aseptic technique and combine the knowledge of human anatomy, surgical procedures, along with the implementation of instrumentation and technology to facilitate a physician's performance of invasive therapeutic and diagnostic procedures. The Surgical Technology Program mission is to train competent, employable, entry level Surgical Technologists that meet the healthcare standards and needs of the community in a variety of settings.

# SURVEYOR ASSISTANT

An occupation developed by our early forefathers that shaped the development of our country; Land Surveying is crucial to responsible land and community development. Land Surveyors work with engineers, architects and builders to produce precise measurements of dimensional relationships, horizontal distances, elevations, directions, and angles, on the earth's surface especially for use in locating property boundaries, construction layout, and mapmaking.

Surveyor Assistants aid and are mentored by experienced surveyors in the field known as Crew Chiefs. A typical survey crew has a Crew Chief and one or more Surveyor Assistants depending on the size and nature of the job at hand. The Crew Chief, either a registered surveyor or an experienced/promoted Surveyor Assistant, leads the day-to-day operation of the survey crew while having direct interaction with his or her Surveyor Assistant. Survey Assistants are expected to perform a wide variety of activities in the field and in the office to ensure the success and safety of the survey crew.

This 310 hour/24 month training program prepares the Surveyor Assistant to complete the National Society of Professional Surveyors Certified Surveying Technician Levels I and II and achieve certification from the National Center for Construction Education and Research. **Apprenticeship option is available for this program.**

**Industry/Program Certification:** National Society of Professional Surveyors (NSPS) & National Center for Construction Education and Research (NCCER)

**Occupational Profile:** <http://www.onetonline.org/link/summary/17-3031.01>

**Consumer Information/Gainful Employment:** [http://www.evit.com/programs/adult\\_programs/consumer\\_information](http://www.evit.com/programs/adult_programs/consumer_information)

**Certification Information:** <http://nsps.site-ym.com/?page=ProfessionalQual>

**Career Pathways:** Instrument Operator, Survey Crew Chief, Survey Technician, Licensed Surveyor, UAS/UAV Operator, Scanning/LiDAR Operator, GIS Technician, Photogrammetry Technician.

**PREREQUISITES:** High School Diploma or GED, Proficiency in Basic Reading and Math.

# WELDING

# WD10

Arizona’s newest International Accredited Test Facility is offering welding certifications through the American Welding Society (AWS) on site. Students will learn basic skills in the SMAW, GMAW (MIG), GTAW (TIG) and OFC processes. During this course students will weld in all positions and practice for AWS certifications. Using NCCER and AWS Sense curriculum students complete modules in each welding process and will perform Welder Performance Qualifications (WPQ) in accordance with AWS standards. When students pass WPQ’s they will receive an internationally recognized AWS certification. Other program modules include: Shop safety, print reading, welding symbols, Welding Procedure Specifications (WPS), theory and fabrication. Graduates can work in a variety of welding industries such as; Mining, Ornamental iron, Structural steel, Shipbuilding, Pipe welding, Aerospace, Weld inspection and Sales. The EVIT welding department’s primary goal is to align our program with industry and prepare students for entry level employment in the welding industry. Instructors are NCCER certified. **Apprenticeship Option is available for this program.**
